SUMMARY

B.Tech Computer Science student at NIT Delhi with strong foundations in data structures, algorithms, object-oriented design, and scalable software engineering. Experienced in building full-stack and machine learning systems, with hands-on expertise in backend architecture, REST APIs, and optimization.

EDUCATION

National Institute of Technology, Delhi

2023 – 2027

B.Tech Computer Science and Engineering

PROJECTS

Billify – Smart Digital Billing System | *React.js, Node.js, Express.js*

GitHub

- Engineered a full-stack digital billing platform with QR-based bill verification to prevent fraud.
- Integrated **10+ RESTful APIs** with Express.js into a responsive React frontend.
- Constructed 2 role-based dashboards for admin and staff, enabling structured transaction tracking.
- Architected a modular backend architecture with routes, controllers, and middleware layers.

PhalFresh – AI Fruit Freshness Detection | *TensorFlow, OpenCV*

GitHub

- Built a CNN-based fruit freshness detection model using the Fruits-360 dataset across 9 fruit classes.
- Optimized TensorFlow inference pipeline to achieve 200ms real-time prediction latency.
- Added a shelf-life estimation algorithm based on ripening trend analysis, improving prediction reliability by 20% compared to baseline linear models.

Health Insurance Fraud Detection | *Python, XGBoost, Streamlit*

GitHub

- Implemented an ML system detecting fraudulent Medicare providers using public healthcare datasets.
- Trained an **XGBoost model achieving 91% accuracy** evaluated with precision, recall, and ROC-AUC.
- Created an interactive Streamlit dashboard for visualizing fraud predictions and provider insights.

EXPERIENCE

Advanced Software Engineering Virtual Internship

2025

Walmart USA (Forage)

- Designed modular software architecture solutions using OOP principles.
- Created UML and ER diagrams for scalable system and database workflows.
- Strengthened practical understanding of clean architecture and maintainable engineering systems.

TECHNICAL SKILLS

- Languages:** C/C++, Python, SQL, JavaScript, HTML/CSS
- Frameworks & Libraries:** React.js, Next.js, Node.js, Tailwind CSS, XGBoost, Pandas, Matplotlib, Streamlit
- Developer Tools:** Git, GitHub, VS Code, Jupyter, MySQL, Draw.io
- CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- Coding Profiles:** Solved 290+ DSA problems across LeetCode and related platforms

CERTIFICATES

- Machine Learning Crash Course – Google Developers
- Full-Stack Web Development – Udemy

Certificate

ACHIEVEMENTS

- 1st Runner-up – Robotics Obstacle Detection Car Race (NIT Delhi, Apr 2024); built an Arduino vehicle achieving **100% obstacle avoidance across a 12+ obstacle track**.

EXTRA-CURRICULAR

- Cultural Club volunteer supporting planning and execution of campus events.
- Represented college basketball team in 10+ inter-college tournaments.
